Definition

For any two objects $n, m \in \mathbb{N}$ of **Pm**, let

$$n \otimes m := n + m,$$

and for any two morphisms $\sigma = (\sigma(1), \dots, \sigma(n)), \pi = (\pi(1), \dots, \pi(m))$ of **Pm**, let

$$\sigma \otimes \pi := (\sigma(1), \dots, \sigma(n), \pi(1) + n, \dots, \pi(m) + n).$$
