

**Lemma.** Given a poset  $\langle \mathbf{P}, \leq_{\mathbf{P}} \rangle$ ,  $\langle \mathcal{A}\mathbf{P}, \leq_{\mathcal{A}\mathbf{P}} \rangle$  is a poset with

$$A \leq_{\mathcal{A}\mathbf{P}} B \text{ if and only if } \uparrow A \supseteq \uparrow B.$$

Furthermore, it is bounded by the top  $\top_{\mathcal{A}\mathbf{P}} = \emptyset$  and the bottom  $\perp_{\mathcal{A}\mathbf{P}} = \{\perp_{\mathbf{P}}\}$ .
