

Definition (Algebraic definition of UMCDPs). An Uncertain MCDP (UMCDP) is a tuple $\langle \mathcal{A}, \mathbf{T}, \boldsymbol{v} \rangle$, where \mathcal{A} is a set of atoms, $\mathbf{T} \in \text{Terms}(\{\text{series}, \text{par}, \text{loop}\}, \mathcal{A})$ is the algebraic representation of the graph, and $\boldsymbol{v} : \mathcal{A} \rightarrow \mathbf{UDP}$ is a valuation that assigns to each atom a UDP.
