

Definition (Twisted arrow category)

Given a category \mathbf{C} , we denote its *twisted arrow category* by \mathbf{TwC} . This is a category which is composed of:

1. *Objects*: Arrows (morphisms) in \mathbf{C} .
2. *Morphisms*: A morphism between two arrows $f : X \rightarrow Y$, $g : Z \rightarrow U$ is given by a pair of arrows $\langle h, k \rangle$ such that the following diagram commutes:

$$\begin{array}{ccc} X & \xleftarrow{h} & Z \\ f \downarrow & & \downarrow g \\ Y & \xrightarrow{k} & U \end{array}$$

3. *Composition*: Composition in \mathbf{TwC} is given by placing commutative squares side by side.
