

Definition (Union of design problems). Given two design problems $f : A \multimap B$ and $g : A \multimap B$, their *union* $f \vee g : A \multimap B$ is defined by

$$(f \vee g) : A^{\text{op}} \times B \rightarrow_{\text{Pos}} \mathbf{Bool}$$

$$\langle a^*, b \rangle \mapsto f(a^*, b) \vee g(a^*, b).$$
