

Definition

Given a DP $\mathbf{d} : \mathbf{F} \rightarrow \mathbf{R}$ we denote by $H_{\mathbf{d}} : \mathbf{F} \rightarrow_{\text{Pos}} \mathcal{U}\mathbf{R}$ the map that associates to each functionality f the set of minimal resources sufficient to realize f :

$$H_{\mathbf{d}} : \mathbf{F} \rightarrow_{\text{Pos}} \mathcal{U}\mathbf{R},$$
$$f \mapsto \{r \in \mathbf{R} : \mathbf{d}(f^*, r)\}.$$

If a certain functionality f is infeasible, then $H(f) = \emptyset$.
