

$\alpha$  ↑

$\text{UId}_\beta$

$\text{UId}_\alpha$

$\langle \text{Id}, \text{Id} \rangle$

The diagram features a large light blue triangle with a black horizontal base. A blue dot is located on the base, directly below the label  $\langle \text{Id}, \text{Id} \rangle$ . A sequence of six black dots is arranged in a curved path starting from this base point and moving upwards and to the left. Brown arrows connect these dots in sequence, pointing from the base point to the first dot, and then following the curve upwards. To the left of the triangle, a red arrow points vertically upwards, labeled with the Greek letter  $\alpha$ . Inside the triangle, the label  $\text{UId}_\alpha$  is positioned between the second and third dots from the base, and the label  $\text{UId}_\beta$  is positioned near the top-most dot.
