

$$\bullet \bullet \bullet ; \diamond = \bullet \bullet \bullet$$

The diagram illustrates an equation between two sequences of colored dots. On the left side of the equation, there are two blue dots followed by a red dot, then a semicolon and a diamond symbol. On the right side, there are two blue dots followed by a red dot. The dots are arranged horizontally and are of uniform size. The semicolon and diamond symbol are also arranged horizontally and are of uniform size. The equals sign is placed between the two sequences.
