

Definition (Symmetric monoidal category). A *symmetric monoidal category* is a braided monoidal category $\langle \mathbf{C}, \otimes, \mathbf{1}, \text{br} \rangle$ for which the braiding satisfies the symmetry condition

$$\text{br}_{c,d} \circ \text{br}_{d,c} = \text{Id}_{c \otimes d}$$

for all $c, d \in \text{Ob } \mathbf{C}$.
