

Definition. Given a DP $\mathbf{f} : \mathbf{F} \rightarrow \mathbf{R}$ we denote by $H_{\mathbf{f}} : \mathbf{F} \rightarrow_{\text{Pos}} \mathcal{U}\mathbf{R}$ the map that associates to each functionality f the set of minimal resources sufficient to realize f :

$$\begin{aligned} H_{\mathbf{f}} : \mathbf{F} &\rightarrow_{\text{Pos}} \mathcal{U}\mathbf{R}, \\ f &\mapsto \{r \in \mathbf{R} : \mathbf{f}(f, r)\} \end{aligned}$$

If a certain functionality f is infeasible, then $H(f) = \emptyset$.
