

Definition (General Euclidean group $E(n)$)

The general Euclidean group of order n , written $E(n)$, is the group of $(n + 1) \times (n + 1)$ square matrices of the form

$$\begin{pmatrix} \mathbf{R} & \mathbf{t} \\ \mathbf{0} & 1 \end{pmatrix}$$

where $\mathbf{R} \in O(n)$ and $\mathbf{t} \in \mathbb{R}^n$.
