

**Definition** (Discrete-time linear systems)

*A discrete-time linear time-invariant proper open system* is defined by three matrices **A**, **B**, **C**. Together they give a recurrence of the type

$$\mathbf{x}_{k+1} = \mathbf{A}\mathbf{x}_k + \mathbf{B}\mathbf{u}_k,$$

$$\mathbf{y}_k = \mathbf{C}\mathbf{x}_k.$$

If **x** has dimension  $n \geq 1$ , **u** dimension  $m \geq 1$  and **y** dimension  $p \geq 1$ , then **A** has dimension  $n \cdot n$ , **B** has dimension  $n \cdot m$ , and **C** has dimension  $p \cdot n$ .
