Definition (Properties of endorelations). An endorelation $R \subseteq A \times A$ is:

> Symmetric if for
$$x, x' \in A$$
:
$$\underline{xRx'}$$

$$\frac{x Rx}{x' Rx}$$

$$ightharpoonup Transitive if for $x, x', x'' \in A$:$$

 \triangleright Reflexive if $\forall x \in A$: xRx;

$$\frac{xRx' \quad x'Rx''}{xRx''}$$
