Lemma. Given $\mathbf{d}, \mathbf{e} \in \operatorname{Hom}_{\mathbf{DP}}(\mathbf{R} \times \mathbf{P}; \mathbf{R} \times \mathbf{Q})$, one has:

$$\frac{\mathbf{d} \leq_{\mathrm{DP}} \mathbf{e}}{\mathrm{Tr}_{\mathbf{P},\mathbf{O}}^{\mathbf{R}}(\mathbf{d}) \leq_{\mathrm{DP}} \mathrm{Tr}_{\mathbf{P},\mathbf{O}}^{\mathbf{R}}(\mathbf{e})}.$$

In other words, trace preserves order on **DP**.
