Definition (Category)

A *category* **C** is a semicategory with an additional constituent and an additional rule:

Constituents

1. Identity morphisms: for each object X, there is a morphism $\mathrm{Id}_X: X \to X$ called *the identity morphism of* X.

Conditions

1. Unitality: It holds

$$\operatorname{Id}_{\boldsymbol{X}} \circ f = f = f \circ \operatorname{Id}_{\boldsymbol{Y}}$$

 $f: X \to Y$
