Definition (General Euclidean group E(n)). The general Euclidean group of order n, written E(n), is the group of $(n + 1) \times (n + 1)$ square matrices of the form

$$\begin{pmatrix} \mathbf{R} & \mathbf{t} \\ \mathbf{0} & 1 \end{pmatrix}$$

where $\mathbf{R} \in \mathrm{O}(n)$ and $\mathbf{t} \in \mathbb{R}^n$.
