Lemma. There is a functor FixResMaxFun: $\mathbf{DP} \to \mathbf{Pos}_{\varphi}$ which maps:

1. An object (poset) of **DP** to the same object (poset) in **Pos** φ . 2. A morphism $\mathbf{e} \in \operatorname{Hom}_{\mathbf{DP}}(\mathbf{F}; \mathbf{R})$ to the morphism $K_{\mathbf{e}} \in \operatorname{Hom}_{\mathbf{Pos}_{\mathbf{o}}}(\mathbf{R}; \mathbf{F})$,

where:

 $K_{\mathbf{e}}^{\star}: \mathbf{R} \rightarrow_{\mathbf{Pos}} \mathscr{L}\mathbf{F}$

 $r \mapsto \{f \in \mathbf{F} \mid \mathbf{e}(f^*, r)\}.$
