Definition (The category **Tup**) The category **Tup** is defined as follows:

- 1. Objects: lists of sets.
- 2. *Morphisms*: A morphism from A to B is a list of n functions $f_i: A_i \rightarrow$
 - \mathbf{B}_i such that $\mathbf{A} = \langle \mathbf{A}_1, \dots, \mathbf{A}_n \rangle$ and $\mathbf{B} = \langle \mathbf{B}_1, \dots, \mathbf{B}_n \rangle$.
- 3. *Composition of morphisms:* Composition is given by function composition.
- 4. *Identities*: The identity on an object $\langle \mathbf{A}_1, \cdots, \mathbf{A}_n \rangle$ is given by $\langle \operatorname{Id}_{\mathbf{A}_1}, \cdots, \operatorname{Id}_{\mathbf{A}_n} \rangle$.
