**Lemma.** Consider  $\mathbf{f}, \mathbf{g} \in \operatorname{Hom}_{\mathbf{DP}}(\mathbf{A}; \mathbf{B})$  and  $\mathbf{h} \in \operatorname{Hom}_{\mathbf{DP}}(\mathbf{B}; \mathbf{C})$ . One has  $(\mathbf{f} \wedge \mathbf{g}) \stackrel{\circ}{\circ} \mathbf{h} = (\mathbf{f} \stackrel{\circ}{\circ} \mathbf{h}) \wedge (\mathbf{g} \stackrel{\circ}{\circ} \mathbf{h}).$
