$\frac{\mathbf{f}_1 \leq_{\mathbf{DP}} \mathbf{f}_2 \quad \mathbf{g}_1 \leq_{\mathbf{DP}} \mathbf{g}_2}{\mathbf{f}_1 \otimes \mathbf{g}_1 \leq_{\mathbf{DP}} \mathbf{f}_2 \otimes \mathbf{g}_2}$ 

**Lemma.** Given  $\mathbf{f}_1, \mathbf{f}_2 \in \operatorname{Hom}_{\mathbf{DP}}(\mathbf{A}; \mathbf{B})$  and  $\mathbf{g}_1, \mathbf{g}_2 \in \operatorname{Hom}_{\mathbf{DP}}(\mathbf{C}; \mathbf{D})$ , one has:

In other words, the monoidal product preserves order on **DP**.
