Definition (Category **Pos**)

The category **Pos** is defined by:

- 1. *Objects*: The objects of this category are all posets.
- 2. Morphisms: The morphisms from a poset X to a poset Y are the monotone maps from X to Y.
- 3. *Identity morphism*: The identity morphism for the poset *X* is the identity map Id_X.
 4. *Composition operation*: The composition operation is composition of
 - 4. Composition operation: The composition operation is composition of maps.
