elements of that subset (those elements $a \in A$ such that $a \succeq_{\mathbf{P}} b$ for all $b \in A$). In formulas:

Definition (Max)

Note that Max(A) could be empty.

Max: $\mathcal{P} \mathbf{P} \to \mathcal{A} \mathbf{P}$ $\mathbf{A} \mapsto \{c \in \mathbf{A} : (d \in \mathbf{A}) \land (d \succeq_{\mathbf{P}} c) \Rightarrow (c = d)\}.$

Max: $\mathscr{P} \mathbf{P} \to \mathscr{A} \mathbf{P}$

Max: $\mathcal{P} \mathbf{P} \to \mathcal{A} \mathbf{P}$ is the map that sends a subset A of a poset to the maximal
