```python
from typing import Collection, Iterator, List

from act4e_interfaces import Element, FiniteSet, FiniteSetRepresentation

class MyFiniteSet(FiniteSet):
    _elements: List[Element]

    def __init__(self, elements: Collection[Element]):
        ...  # to implement

    def size(self) -> int:
        ...  # to implement

    def contains(self, x: Element) -> bool:
        ...  # to implement

    def elements(self) -> Iterator[Element]:
        ...  # to implement

class MyFiniteSetRepresentation(FiniteSetRepresentation):
    def load(self, yaml_data: str) -> FiniteSet:
        ...  # to implement

    def save(self, f: FiniteSet) -> str:
        ...  # to implement
```
