```python
class MyFiniteSet(FiniteSet):
  def __init__(self, elements: Collection[Element]):
    self._elements = list(elements)  # new list

  def size(self) -> int:
    return len(self._elements)

  def contains(self, x: Element) -> bool:
    for y in self._elements:
      if self.equal(x, y):
        return True
    return False

  def elements(self) -> Iterator[Element]:
    # return a copy of our list
    for _ in self._elements:
      yield _
```
